

FINAO ...

**Empowering
Image Data
Inside & Outside
The Office**

FINAO can be your PACS providing long-term store, secure web-access, HL7 interfacing, Modality-Worklist, and 24/7 support.

The FINAO solution enables the practice and referring physicians to:

- Use a sophisticated web and instant messenger type technology that enables radiologists and referring physicians to securely access images and patient information when they want, wherever they want – thus eliminating frustration and wasted time spent tracking down information.
- Use personalized workflow management making it possible to create a vast number of custom workflows for everyone involved in the radiology round trip. For the radiologist or local physician, this means optimized reading patterns and enhanced communication. For the referring physician, this means quicker results and better service.
- Access to images, priors, reports, and all relevant patient information are available within powerful Web-based interface that provide the physician/clinician with the right tools for their review – no matter where they are located – with a common user interface.
- Track & distribute patient exams in real-time, thus giving all constituents visibility into where their patients are in the imaging workflow.
- VIEWING Capabilities that include:
 - Web-based accessibility
 - Study and user level hanging protocols
 - Standard image review and manipulation tools (window/level, zoom, pan, magnify, stacking, etc.)
 - A variety of measurement and annotation tools
 - Automatic display of scout lines
 - Identification of key images for referring physicians
 - The ability to automatically or manually link series
 - 3-D Cursor, MIP, MPR, Color Volume Rendering, Presets, and 3D image capture
 - Compare previous studies

(failure is not an option)

FINAO-PACS — Empowering Image Data Inside & Outside the Office

FINAO provides additional services & tools that:

- Support & Management of the PACS 24x7.
- Maintain fluid flow of imaging studies through the customer defined workflow.
- Route radiology reports directly to the local EMR.
- Provide access and training to all referring physicians.
- Allows for future enhancements of information distribution via FINAO HL7 messaging.
- Scan patient paperwork or history directly into the study.
- Modality Work-List for sending modalities.

FINAO Solutions

FINAO Solutions is a services and software company that develops, supports, and manages solutions for customers in the healthcare and corporate markets. FINAO Solutions has aided practices and companies in moving from paper-based processes to complete electronic solutions. FINAO maintains a high-level expertise in EMR, PACS, and HL7. FINAO Solutions has partnered with leading software companies to provide comprehensive solutions to its customers.
